deso: in a terminal type sudo parted -l EriC^, deso: ok, type sudo mkdir /mnt/storage && sudo mount /dev/sda4 /mnt/storage deso: then see if it's there jujaweed: I've done it before. It was quite amusing. EriC^, we go EriC^, yep, its there jujaweed: I don't use it much, but if you're really low on space, consider moving /tmp deso: ok, try cat /mnt/storage/test.txt jujaweed: it stores so much stuff. deso: does it output a file? EriC^, it output a file deso: type cat /mnt/storage/test.txt | nc termbin.com 9999 jujaweed: I'm using it right now. 6GB of space with hash\_history deso: ok, try cp /mnt/storage/test.txt /media/deso/ deso: if that works then the partition is mounted, so it should have the permissions of your user, and if it doesnt, then try chown -R /media/deso/ EriC^, it worked deso: cool Is there a "Desktop Search" (ex. search for files in Google Drive) for open source projects? deso: great, close the terminal jujaweed: then there's /boot jujaweed: and /usr jujaweed: I'd assume /var too. 82157476af
